

The original hardware wallet.

Trezor One is the world's first hardware wallet, invented to keep your bitcoins safe. Over time, it evolved into a powerful cryptocurrency wallet, with support for various coins and tokens, it can also be a password manager for your convenience. The Trezor One is a pioneer of its category, trusted and used by many satisfied users around the world. Its design incorporates a detailed display for verification of all operations and buttons for physical confirmation. All processes are run on the internal CPU, isolating your confidential data from the internet. The original Trezor is a solid hardware wallet choice for all.
